

Profile

PT Hanz Kode Terpadu is an AI start-up and software developer in Jombang Regency. We build applications, networks, servers, and AI on the premises of agencies, regional government-owned companies (BUMD), and businesses, and make free apps for the public and small businesses.

Core competences

Applications and integration	Web and mobile apps, official websites, SPBE e-government data links, upkeep of old apps
Networks and security	Office networks, local or rented servers, data backups, security checks
AI on the agency's server	Document Q&A assistant that cites its sources (tested internally, not yet installed at a client)
Advisory	IT health checks, digitalisation plans, technical training for staff

Products

BukuGembok, QRIS-EDC, NotaKita, SAVIS, LMS Adaptif	Ready to use
Digital signatures (uncertified)	On request
JombangSatu, public service portal (not an official Regency Government service)	Prototype

Why us

- Systems and data stay on the agency's server.
- A local small business from Jombang Regency.
- The founder handles the work personally, even after the project ends.
- Licence paid once, with no monthly rental.
- 6-month bug-fix warranty from handover.
